### **DETAILED ACTION**

This action is responsive to application filed on January 11, 2002 Claims 1-27 are presented for examination.

#### ***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-17 are drawn to routing messages to allow communication over a controller area network (CAN), classified in class 709, subclass 238.
  - II. Claims 18-27 are drawn to handling registration of a processor-enabled peripheral device with a controlling software component, classified in class 709, subclass 223.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions I to II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as breaking the logical connection between the processor-enabled peripheral device and the controlling software, lacking one or more of the particulars of inventions of I. See MPEP 806.05(d).
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Because these inventions are distinct for the reasons given above and the extensive search required for one group is not required for the other groups, restriction for examination purposes as indicated is proper.

5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

6. A telephone call was made to Charles W. Bethards on September 23, 2005 to request an oral election to the above restriction requirement. Charles W. Bethards made no election over the phone.

7. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

8. A shortened statutory period for response to this action is set to expire 0 (zero) months and 30 (thirty) days from the mail date of this letter. Failure to respond within the period for response will result in ABANDONMENT of the application (see 35 U.S.C. 133, MPEP 710.02, 710.02(b)).
